

Hazard Assessment/ Job Hazard Analysis -Course Summary-

Length of Course: 4 hours

Course Objectives:

- A Hazard assessment / Job Hazard Analysis is a fundamental tool used to review your processes so that potential hazards can be proactively identified and then controlled.
- This course provides a step-by-step overview of the process, and defines your role in making it effective.

Topics include:

- Gaining support for and participation from line employees, supervisors, and upper management.
- Identification of the key requirements for a successful Hazard assessment and or Job Hazard Analysis
- Recognizing the hazards inherent in all task performance.
- Development of appropriate solutions and hazard controls.
- Completion of a Hazard Assessment / Job Hazard Analysis form.
- In addition, through lecture, demonstrations, and workshops, you'll learn how to effectively develop and manage a Hazard assessment / Job Hazard Analysis program in your workplace.

Target Audience:

- Safety Program Administrators
- Equipment operators
- Safety Coordinators
- Safety Committee Representatives
- Safety Specialists
- Loss control managers
- Human Resources
- Operations managers
- Safety Managers
