

OHST/ CLCS Exam Certification Preparation Course

Length of Course: 3 days

Course Description :

- This intensive three day exam preparation course will give you a knowledge base that you can build your OHST/ CLCS study plan on.
- You will receive numerous references and study materials that you will need to: 1) Submit your OHST/ CLCS application, 2) Prepare for the examination.

WHAT IS AN OHST® or CLCS?

Both the OHST and CLCS certifications are fully accredited and respected by both employers and governments on a national and international level.

These certifications are administrated by the Board of Certified Safety Professionals (BCSP) and have received accreditation by the National Commission for Certifying Agencies (NCCA) and the National Skill Standards Board (NSSB).

Course Agenda:

- Day 1) Introduction to CCHES^T procedures; Mathematics, Statistics, Calculator usage; Physical, Life & Chemical Sciences; Laws, Regulations, Standards, Government.
- Day 2) Behavioral and Organizational Science; Business and Management; Training/Education; Safety in Design, Controls, Technology; Risk Management; Safety Management, Inspections, Investigations, Audits.
- Day 3) Fire Protection; Industrial Hygiene; Ergonomics; Hazardous materials; Professional Development and Ethics; Examination examples and strategies

WHY OHST®/ CLCS ARE BETTER THAN OTHER CERTIFICATIONS?

1. Credibility, 2. Recognition, 3. Accreditation, 4. Respect!

Beware of certifications that require you to take their course to be "certified". Although the knowledge provided in their course may be of value, and you may appreciate the coffee mug, t-shirt and other gimmicks they provide, their certification is not likely to be recognized by others in the industry.

WHAT IT TAKES TO BE AN OHST®/ CLCS?

1. You have to be working part-time or full-time in safety and health (35% is the minimum)
2. You must have duties that require technical skills and knowledge in safety and health
3. You must have five years of experience in safety and health
4. Finally, you must pass an examination provided by the Council on Certification of Health, Environmental and Safety Technologists

Many past students have taken this course as a stepping stone or as a study resource for their CSP designation!

Neither this nor any other prep course is affiliated or otherwise endorsed by the CCHES^T. Taking this course does not guarantee that you will pass the examination. You will be required to work and study hard!

Course Facilitator:

Trevor has been coaching firms to improve their safety performance since 1997. He has a MS in Occupational Health and Safety in addition to an MBA. Trevor is also a Certified Safety Professional (CSP), a Canadian Registered Safety Professional (CRSP), A Certified Occupational Hearing Conservationist (COHC), and an OSHA outreach trainer. Trevor's unique take on the business management aspect of safety has proven to be a valuable resource for our partners.
